01 Profile

I build automation systems and software that remove manual work from businesses: Make.com and n8n scenarios, AI agents, GoHighLevel CRMs and funnels, Framer sites, and the social media systems that post every day without anyone touching them. I find the real cause before changing anything, write things down, and hand over systems clients can run themselves. Open to freelance projects and full-time or part-time remote roles.

02 Experience

Founder — Present

LuminnaLeads · automation, outreach and web studio · Remote

- Build cold-outreach, lead-sourcing and CRM systems for small teams, end to end.
- Run social media for clients with scheduled posting across X, Instagram, LinkedIn and TikTok.
- Ship internal tools and integrations with Claude Code, from prompt to deployed and documented.

Freelance Automation Specialist — 2020 to Present

Fiverr (Level 2) and Upwork · clients in the US, UK, Germany, Poland, Australia and more

- Delivered Make.com, n8n and Zapier workflows, many of them 40+ module systems with routers, error handling and AI steps.
- Built and fixed GoHighLevel accounts: funnels, pipelines, calendars, booking widgets and automation workflows.
- Designed landing pages and sales funnels in GoHighLevel and Framer for coaches, academies and service businesses.
